SUMMURY

I am a front-end developer with 3 years of experience in improving, maintaining and building websites.

In search of improvements to the existing functionality, I started the journey of a full stack developer. I had experience working with different CMS (Wordpress, Opencart, Shopify, Prestashop, Mobx, Webasyst), as well as full-featured sites on Node.js and Nuxt.js.

I like it when the end user of the product is pleased to use it, this is one of the main reasons why I love my job. I have a sensible attitude to criticism and I consider it as the engine of progress. I believe that the solution of problems should be approached by considering them from different sides. I work well in a team.

EDUCATION

Ukrainian State Chemical Technology University, Dnipropetrovsk

Full Stack Developer   10/2020-Now
Front-end Developer   09/2018-Now

Freelance
📅 1/2018 - Now

Working with clients on sites for freelancers.

I take small orders for freelancing. Usually it is an adaptive layout, plugin connection or revision, bug fixes, CMS functionality extension. I have worked with a variety of platforms (indicated in SUMMARY). I always discuss details with the customer and do not miss the agreed deadlines.
